MasternodeOutputs

Sendmany

Please download the latest **Zero Core v.3.3.1** wallet to host the Masternode.

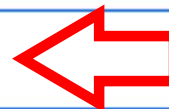

If you are already on the latest version and have **10,000 ZER**

(sent in 1 transaction) in your wallet, you can skip this guide and insert the txhash in the field below, otherwise:

1. Open the **Zero** debug console from the top menu -> **Tools** -> **Debug console**.
2. In the Debug console type `getnewaddress`. An address will be generated. It will be referred to as the "**collateral address**".
3. Send exactly **10,000 ZER** (no more, no less) to the collateral address you just generated.
 - Make sure that "**Subtract fee from amount**" is NOT checked.
4. Open the "**Transactions**" tab in your **Zero** wallet.
5. Find the transaction that you just made, it should be titled "**Payment To Yourself**".
 - Right click on the transaction in the list and click "**Copy Transaction ID**" Paste this ID below.

Enter the Transaction ID from step 5 and Pecunia will locate your collateral address and index.

Filtering Options

- ☐ exclude transaction outpoints already existing in my account
- ☐ exclude transaction outpoints already existing in the list of active masternodes

CONTINUE

DEPLOY TO PECUNIA

You have the option to use masternode privatekey from an old installation

Input Masternode Private Key

User can input MN private key

Generate Masternode Private Key

New MN private key will be generated

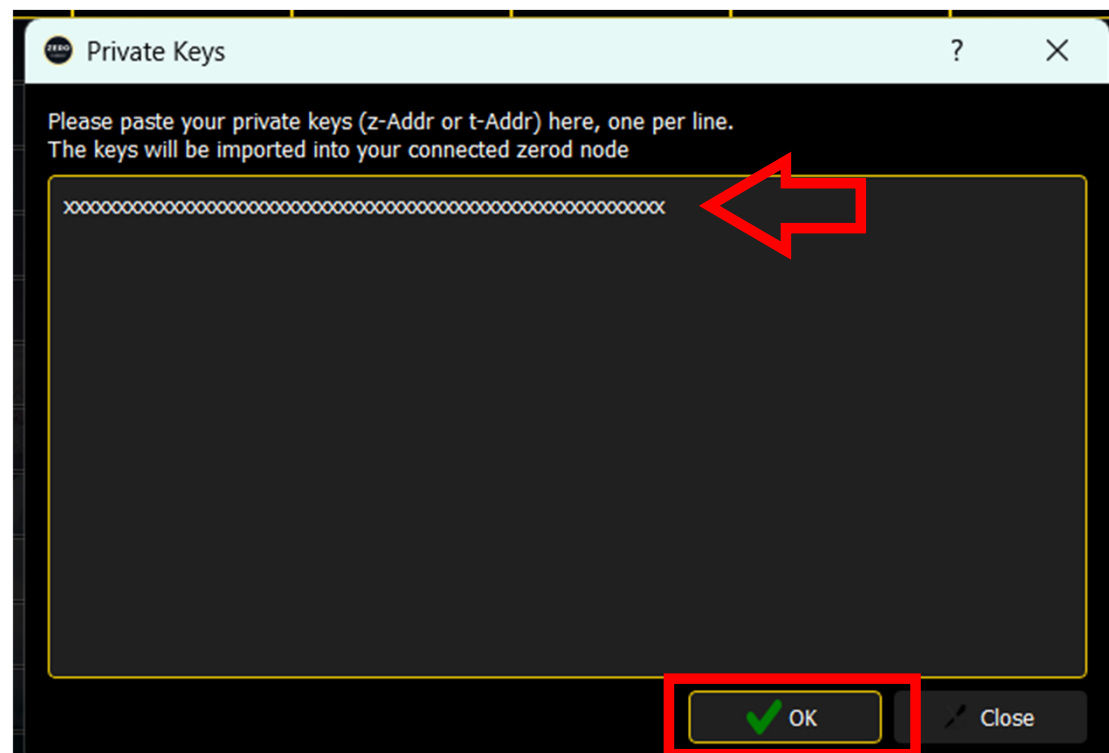

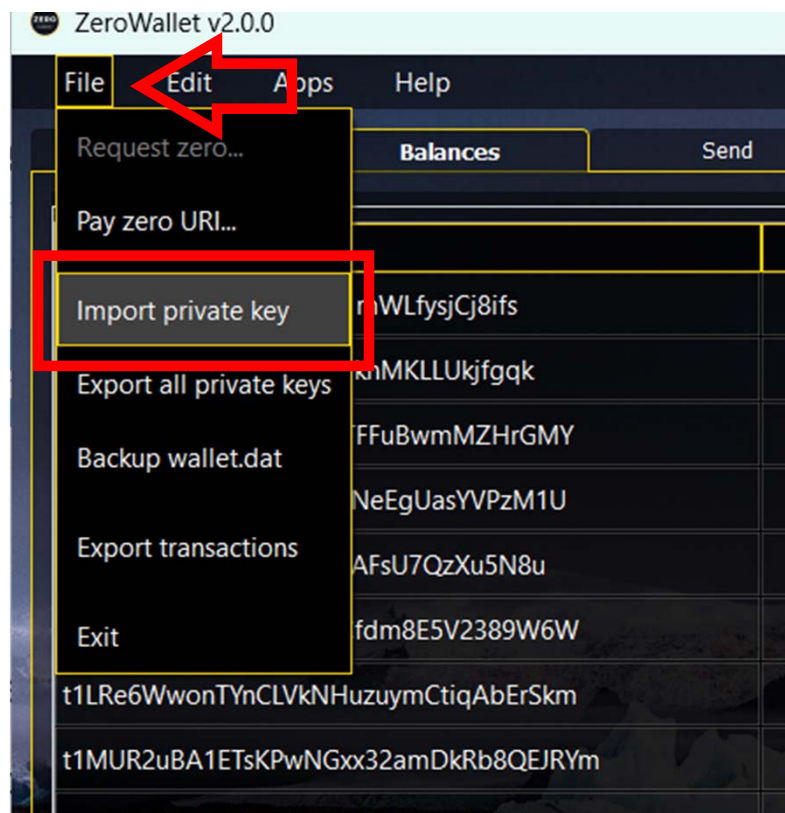

Advanced ☐

We are ready to proceed! Kindly press **"Deploy Server"**.

We will provide your configuration settings after your node server deployment.
The server deployment process takes less than 2 minutes.
